Mexico first driving force economic in Latin America.

The rate economic growth on first four years on the actual administration was 2.1%, exceed 0.8% that was reported for Latin America and the Caribbean. This growth of the country on the time studied was superior even on the average of the countries of the Organization for Economic Cooperation and Development (OECD) that was 1.9%.

“Actually, in recent years, Mexico has become the first driving economic force in Latin America and Caribbean” said the fifth government inform.

In the document said that in this administration the Mexican economy has registered a positive growth in every year in each trimester on an annual rate.

Also of the 20 most biggest economies in the world, China and Mexico were the only that increase their value on goods exportations.

Trough the last administration were attracted in FDI an historical amount of 156 billion

dollars, which exceeded, in only fourth and a half years, the mount received trough the six first years on any other administration and its equivalent to 9.9% of the aim planted on the National Development Program 2013-2018.

Regarding inflation, Mexican economy was witness in 2017, of a decrease who boots the inflation. However, rate average inflation on this administration was 3.6% and stablished it on the lowest level in 45 years.

The international scenery will be complex but Mexico has improved and its recognized as an emerging economy.

Regarding the national scenery on renegotiation of North American Free Trade Agreement (NAFTA), Mexico will collaborate with the United States under a principle of mutual responsibility.

Source: El sol de México

Automotive enterprises from United States made historical investments in Mexico.

On the first semester of 2017, 66 per cent of all FDI in Mexico to the automotive sector comes from American enterprises, even though uncertainly which cause of NAFTA renegotiation.

Even though uncertainly among the results that renegotiation on NAFTA can come, the automotive enterprises from United States did not stopped their investment projects in Mexico and registered an historical level in the first semester of 2017.

On the first six months of 2017, this companies invest around 2.406 billion dollars, more than two fold that they spend in 2016 when only invest around 912 million dollars according to Ministry of Economy.

Luis Lozano, Director of Gubernamental Relations at Toyota, said in an interview, that are confidence in the governments and negotiations of NAFTA finished in good terms.

“We are on the side of the information and we are going to defend our position (no changes for automotive sector in NAFTA) with data. This modernization (of NAFTA) has to

generate value and of course, increase trade between nations” added Eduardo Solís, president of Mexican Association of Automotive industry (AMIA).

On the first semester of 2017 the FDI in automotive sector arise around 3, 625 million dollars which 66 per cent comes from United States. Among the biggest brands who invested in Mexico, stand out Fiat Chrysler Automobiles (FCA), who starts to produce in 2017 the Jeep Compass in his plant in Toluca, State of Mexico.

Flavio Volpe, president of the Canadian Association of auto-parts industry said that North America is very competitive and this is due to low cost of Mexico this is one of the reasons to invest in Mexico.

Gabriel Casillas, General Director of economic analysis at Banorte consideres that the new NAFTA will not affect national industries.

Pemex will invest in international exploration

Mexican National Oil Company, Petróleos Mexicanos (Pemex), will partner with multinational companies such as Shell, ExxonMobil, Chevron, Total S.A. and British Petroleum, among others, to participate in oil field bidding rounds offered internationally expecting reserves between 200 million and 300 million barrels over the next four years.

According to Mexico's 2018 Economic Package, the country will invest MXN\$ 20, 942 million between 2017 and 2020 on exploration specialized studies both in Mexico and abroad.

The investment scheme is part of a portfolio renewal that expects to restore the extracted reserve in a profitable and sustainable way incorporating reserves per 1,100 million crude oil barrels aligned with the average incorporation of the last five years. By 2020, 20% of the expected 1.5 billion barrels may be from reserves in other parts of the world.

To achieve this, in addition to the exploration studies in the allocations granted to Pemex, the Mexican National Oil Company will participate in international licensing rounds in a search for the straightening and the diversifying of the exploratory portfolio.

Pemex Exploration and Production subsidiary (Pemex Exploración y Producción abbreviated PEP) proposes to allocate

specific financial resources to accelerate the characterization and delimitation of the new discoveries reducing the periods between discovery and production in the short and medium term.

The immediate program contemplates the delimitation of important discoveries made in 2015 and 2016, as well as the delimitation in farm out agreements.

In addition, considering that 80% of the investment in explorations is related to the drilling-completion of exploratory wells and delimitation, it is essential to continue with an improved process for operational efficiency that will allow cost reduction.

Mexican Murals

Mexico has a long tradition of mural painting. This legacy dates back to the pre-Hispanic period with an ancient civilization called the Olmecs, which produced some of the earliest known painted in south america. This tradition continued under Hispanic rule as murals were used to introduce the Mexican people to the stories and ideas of Catholicism. Form this point on, mural painting became one of the most dominant dorms of art in Mexican culture, a country wide tool for means of expression. This precedence provided a ready made platform for the politically motivated and fostered the birth of the Mexican Muralism movement.

The History of Mexico (mural)

One of the most iconic murals was The History of Mexico, mural made by Diego Rivera who is in the stairwell of the National Palace in Mexico City was executed between 1929 and 1935. The subject of the mural is Mexico's history from ancient times to the present. The depict the many struggles of the common Mexican people to fight against Spanish, the Frenchs, and the dictator that controlled different points in its story.

Juarez, Clery and the imperialists (mural)

This piece was located at National Museum of National History. Which Orozco try to show mettle and straighten of Benito Juarez facing betray who try to give to the country of foreign invasions mainly during french invasion.

Amazon plans mega warehouse for Mexico growth spurt

Amazon.com Inc is preparing to open a 1 million square-foot warehouse near Mexico City, sources familiar with the project said, part of an effort to boost its presence in Mexico's nascent e-commerce industry.

The new warehouse is slated to be built in the Tepoztlan municipality about 25 miles (40 km) north of the Mexican capital, according to four Mexico City real estate professionals familiar with the plans. Expected to be completed next year, the facility would triple Amazon's distribution space in Mexico, home around 120 million potential customers.

Amazon's Mexico push comes amid talks to revamp the North American Free Trade Agreement, which could benefit the Seattle-based retailer if the United States persuades Mexico to raise a \$50 limit on the value of online purchases that can be imported duty-free.

Amazon is a relative newcomer to Mexico; it opened its Kindle e-books site to Mexican customers in 2013 and expanded into sales of physical goods just two years ago. But it is growing much faster than rivals such as Wal-Mart Stores Inc, and is already the nation's third-largest online retailer.

Amazon is a relative newcomer to Mexico; it opened its Kindle e-books site to Mexican customers in 2013 and expanded into sales

of physical goods just two years ago. But is growing much faster than rivals such as Wal-Mart Stores Inc, and is already the nation's third-largest online retailer. Amazon posted \$253 million in sales in Mexico last year, more than double the year before, according to market research firm Euromonitor International.

The new warehouse will be constructed about 7 miles (11 km) from the existing facilities. All are located along the so called "NAFTA" highway, an industrial belt that runs through Mexico's factory regions to the U.S. border.

The new facility is being built by U.S. based industrial developer Prologis, which owns 45.9 per cent of Fibra Prologis, a Mexico-based real estate investment trust that owns 34.2 million square feet (3.2 million sq m) of manufacturing and logistics space across Mexico. Fibra Prologis typically acquires properties from Prologis once they are completed.

At 1 million square feet, the new facility would be able to distribute bulky products such as furniture, as well as small items like books and microwaves, a set-up Amazon uses in other foreign countries, said Marc Wulfraat, president of the logistics consultancy firm MWPVL International.

Presidential order for the establishments of Free Economic Zones in Mexico

The normative to establish Free Economic Zones in Mexico are ready, later that the last week of September were announced the new presidential order to establish this zones which open up to develop industrial projects in the south of the country.

This specific zones are in Puerto Chiapas, Lázaro Cardenas y Coatzacoalcos, reveled Gerardo Gutierrez Candiani, Manager of Projects.

“The order signed and declared by the president its the base constitutional, legal, package of incentives, land definitions, and the rules of where can be this zones, who you can invest in this zones and which are the facilities, all this are included in the presidential order” he said.

Along with other decrees, there will be announced some major investments in this Economic Zones “We already have a package very interesting for this three first zones. We have around of 200 enterprises which are in process and we have nearly 35

companies that are interested on the profile of this three first zones.

The Free Economic Zones are the project of this presidential administration which the Federal Government wants to boost development in marginated zones in the country.

Free Economic Zones are Puerto Chiapas, Lázaro Cárdenas, Coatzacoalcos y Salina Cruz. This decree has a little delay. said Candiani, which who doesn't precise the reason, we can suppose that is by the recent earthquakes. “We are missing Oaxaca, which for obvious reasons we have a little delay.

Gerardo Corrochano, Director of Word Bank for Colombia, Mexico, Latin America and the Caribbean, declared in a recent visit in May that this an example that we have to avoid in the establishment of the Free Economic Zones.
